

WEIGHMORE Shackle Scale

Heavy Duty / In-Motion

Built Better... Because We Care!

CONFIGURABLE-DESIGN

You Want It, We'll Make It.

The Heavy Duty Shackle Scale is specifically designed to weigh whole beef carcasses in motion.

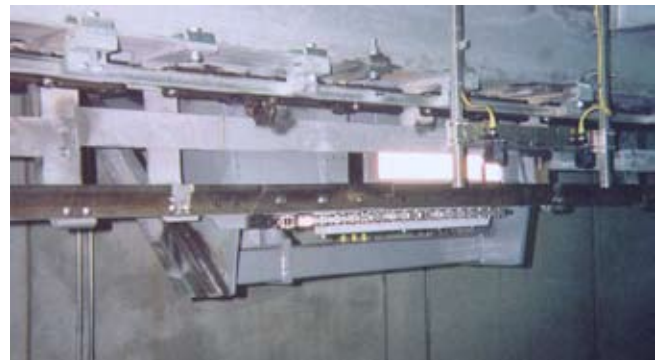

Long recognized as providing the highest accuracy for in-motion weighing in the packing industry, Vande Berg Scales presents the WeighMore® Heavy Duty In-Motion Shackle Scale.

The Heavy Duty Shackle Scale was specifically designed to weigh whole beef carcasses.

Built on the same principles as the WeighMore® High Accuracy Monorail, the WeighMore® Heavy Duty In-Motion Shackle Scale accurately weighs up to 4,500 lbs capacity, giving you the accurate carcass weights you expect.

This design is a perfect match for many locations in slaughter plants where individual carcass tracking requires accurate in-motion weighing on the rail.

The WeighMore® Heavy Duty Shackle Scale operates accurately while weighing whole carcasses.

Built with food safety in mind.
