

Built Better...

Because We Care!

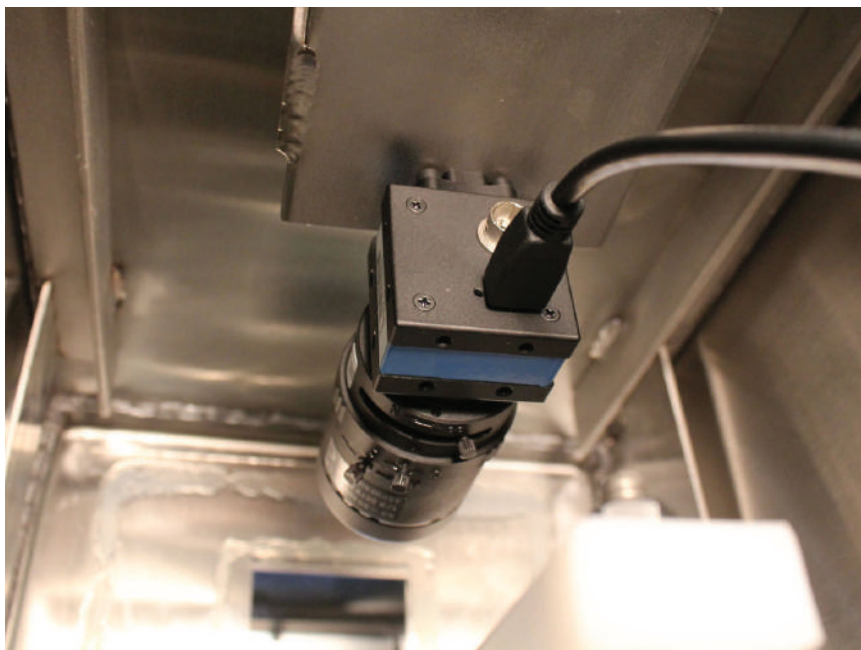

Trolley Vision® G7U

The Vande Berg Scales Trolley Vision® system is designed for harsh environments, provides easy maintenance, guaranteed reading rates exceeding 99.5% with proper maintenance, and has been re-designed using the latest technology in digital imagery, with over 40,353,607 numeric identities available and no duplicates made.

Trolley Vision® has a unique pattern of holes in each trolley. This pattern of holes gives each trolley a unique number, similar to a license plate.

As each carcass passes by the reader an automatic reading is taken. Trolley Vision® is built to handle tough packing house conditions. It is simple to operate and very reliable. Trolley Vision® has been used in over 25 plants internationally. With many years of development and fine tuning, we are ready to help you get the carcass tracking system you need!

Trolley Vision® camera

Applications:

- Grade Identification
- Kill-floor Yield Tracking
- Specie Yield Performance
- Supplier Yield Performance
- Traceability

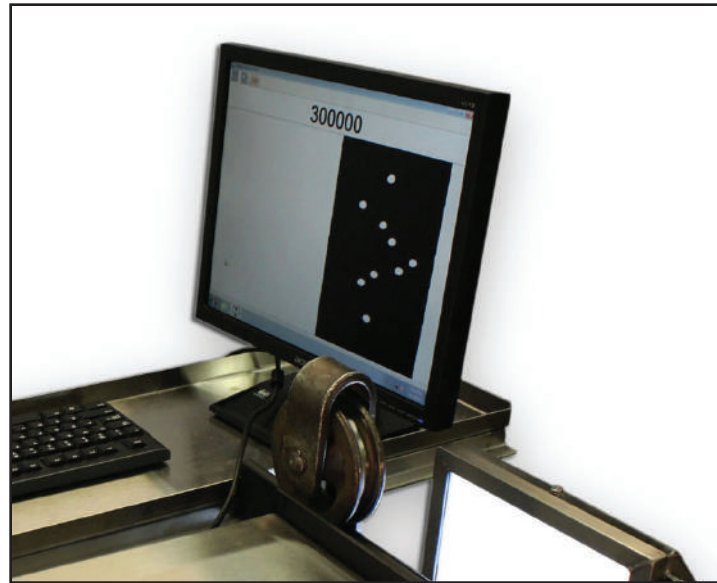

Built with food safety in mind.
