

Conveyors & Conveyor Systems

Finding nickels & dimes in better yield design

We're your leader in conveyors and conveyor technology!

CONTROL YOUR PLANT; CONTROL YOUR BOTTOM LINE!

Vande Berg Scales gives your plant state-of-the-art automated material handling capability. We engineer and design our conveyors with you in mind. This, along with our extensive knowledge of applications allows us to develop conveyor systems that fit your plant's needs. At Vande Berg Scales, we manufacture conveyors that are very cost effective, easily expandable, and easily reconfigured. With a little imagination and a small investment, you can do wonders with reducing manual material handling through the use of our conveyor systems!

*Let us move
it for you!*

CONFIGURABLE-DESIGN

You Want It, We'll Make It.

Incline conveyor with flights & cleanable product guides

Conveying product in a labeling and palletizing room

Box turning conveyors to rotate your products in motion

**VANDE BERG

Division of VBS, Inc.

We build conveyors and conveyor systems designed to fit into any of your production lines or to function in stand-alone applications. Vande Berg Scales manufactures conveyors built with food-grade stainless steel and are specially designed for wash-down and harsh environments. Our conveyors and conveyor systems can also be incorporated into your facility's traceability system to track production from start to finish. Easy access to all direct contact surfaces makes wash-down easy and there is no need to stop the conveyors to clean them.

Vande Berg Scales' conveyors and conveyor systems offer the flexibility of choosing a standard size or having a conveyor or system engineered to exactly fit your needs. The conveyors and systems are made to be compatible with our **NTEP Approved** conveyor scales, sortation systems, or as a stand alone system. Stainless steel construction assures durability, reliability, and longevity. Whether you need a single conveyor or a complete system, a standard size or one built to your specifications, we can deliver the conveyors to fit your needs.

What we do best is solve problems! We provide distribution centers and manufacturing plants with high quality, stainless steel conveyor systems. Through the years, our conveyor systems have helped large warehousing and distribution centers increase productivity, move products and materials faster, easier, increase efficiency, and have helped increase plants' bottom line.

90° roller, powered roller to move your product

Co
an

Stand alone conveyors of almost any

Indexing conveyor with drop-down stop for spacing

Incline

oller, or modular conveyors
t around corners

complete conveyor systems to index, weigh, divert,
d move your product where you want it

Gravity roller conveyor
